PI WEBCAST ROUNDS

Presenting Site: BC Children's Hospital, Vancouver, British Columbia

Disparity in age: An interesting case of primary immunodeficiency in a family cohort Presenter: Dr Elliot James

Learning objectives:

- 1. Review and discuss an interesting case of primary immunodeficiency presenting in infancy
- 2. Describe the pathophysiology and clinical manifestations of this primary immunodeficiency
- 3. Review the literature and understand the role of HSCT in this primary immunodeficiency

Primary immunodeficiency in a patient with antimyelin oligodendrocyte glycoprotein (anti-MOG) neuroinflammatory disorder. Presenter: Dr Alanna Chomyn

Fresenter. Di Alainia

Learning objectives:

1. Describe a case of primary immunodeficiency in a pediatric patient with anti-MOG neuroinflammatory disorder.

2. Discuss the pathophysiology and clinical manifestations of this underlying immune defect.

3. Review the literature regarding neurologic manifestations of this disorder, compare and contrast findings in the literature with cases at our centre.

Moderated by Dr. Chaim M. Roifman
